

Top tips for an enjoyable holiday abroad

1

Service your vehicle and carry out the appropriate safety checks a few weeks in advance so that any little problems can be sorted before you set off

2

Stock up with legal requirements - GB sticker, beam benders, first aid kit, bulb kit, breathalyser kit, extinguisher and a warning triangle (some countries require you to have two)

3

Buy a good European map and in-car compass

4

Stock up with enough items to occupy your passengers and make them comfortable during the trip

5

Squirrel away some euros in the glove compartment for the tolls and service stations that don't take debit or credit cards to ensure your journey continues smoothly

6

Remember the appropriate documentation: passport, driving licence, insurance certificate allowing continental use, MOT and V5 registration. Consider photocopying your documents and keeping them separately from your originals

7

Make sure that you are fully insured so you are covered if anything unfortunate should happen in foreign climes. Club Care offers European use insurance cover - up to 365 days to any European Community country, Croatia, Iceland, Norway, Andorra, Switzerland (including Liechtenstein). Plus, there is no need to let Club Care know before you travel so you can get up and go, safe in the knowledge that your insurance is in place. To get a quote visit us online or call our quote team on 01277 243060.

8

Check your essential equipment list to ensure you have everything you need in case of any eventuality

9

Remember motorhome safety on the move; carry out all the recommended checks

10

Arrive at the port well in advance of the scheduled boarding time

11

Turn off the gas supply before boarding

12

If you are travelling by ferry, note the deck and staircase number to help you locate your vehicle when you return. You will not be permitted access to your motorhome during the journey so take everything with you that you might need, including passports and tickets

13

Park in gear with the brake applied

14

When exiting the port on the other side of the Channel, remember to drive on the right!
